### Product Benefits

- Quickly input existing work using a digitising tablet
- Automatically collect pattern pieces from style lines.
- Increased productivity, getting products to the market faster.
- Create new styles using comprehensive line tools and measurement commands.
- Use existing work to quickly generate modifications or new designs
- Fully compatible with all cardboard & leather cutting machines

### Product Overview

Shoemaster Leathergoods is an intuitive and easy to use interface perfect for pattern engineers who want to begin working with CAD CAM.

The system allows the user to input existing work into the system using a digitising tablet. The pattern pieces then generated are used for cutting and production purposes.

New designs can also easily be created using comprehensive shape & measurement functions.

Shoemaster QS Leathergoods can be used by pattern engineers to create bags, accessories and many other general Leathergoods such as purses, wallets and keyrings.
